WORK EXPERIENCE

Freelancer

Sep 2019 - Present

Work directly with a French developer and use React and React Native to build 2 websites and 2 apps

- **Paper** - <https://paperimmo.fr/> - A real estate platform, receive the latest real estate listings in real time.
- **Lespeakers** - <https://lespeakers.com/> - A platform linking conference and event organizer

Technologies used:

- React
- React Native
- Typescript
- HTML/SASS
- Redux
- Firebase
- Styled Components

Software Engineer

Feb 2018 - Aug 2019

Working at Ami, a startup company with the foundation of a real estate management system. With the desire to build an ecosystem for smart city, we have developed a lot of products, and these are the projects I have been involved in:

- **Ami CA:** Lead team Frontend with 3 members to build 3 apps at the same time: Citizen Mobile App, CA Mobile App (for Police) and CA Desktop (Web) App in only 1 month
- **Ami Exchange Online:** Lead team Frontend with 3 members to build the real estate webapp to help users find houses, condominiums, apartments for sale and rent
- **Ami City Blog:** Using Ghost to build a blog website for Ami City in 1 week
- **Ami Rooms:** Setup the project structure and do some task for Ami Rooms. This website can help everyone find the room to rent.
- **Ami Landlord:** Build the web app for Landlord and Manager. It will provide the solutions to manage properties and citizen by technology, help the Landlord optimize the process, manage professionally - effectively, save time – cost
- **Ami Electricity App:** The meter will send number of kwh to this app. So that users can track, view report and know which device is using the most power
- **AMA App:** Ami A is a platform for SMEs to record supply chain data, monitor and authenticate products based on Blockchain, Smartcontract, Big Data technology ... This app was used in Tu Hung cup
- **Ami Building:** Build the web app for Building Manager. It will provide the solutions to manage building and residents by technology, help the Management optimize the process, manage professionally - effectively, save time – cost
- **Building Staff:** Implementing the app for staff of building. With this, staffs can receive notification from citizen and manager about the issue of apartment or building. Update issue status and schedule tasks status.
- **Ami Hero:** Working with Hero Mobile App, that is the app for the maintenance man. This app will help them to receive the issues which are reported from renter, change issue status, send feedback, estimate price, report to landlord and renter

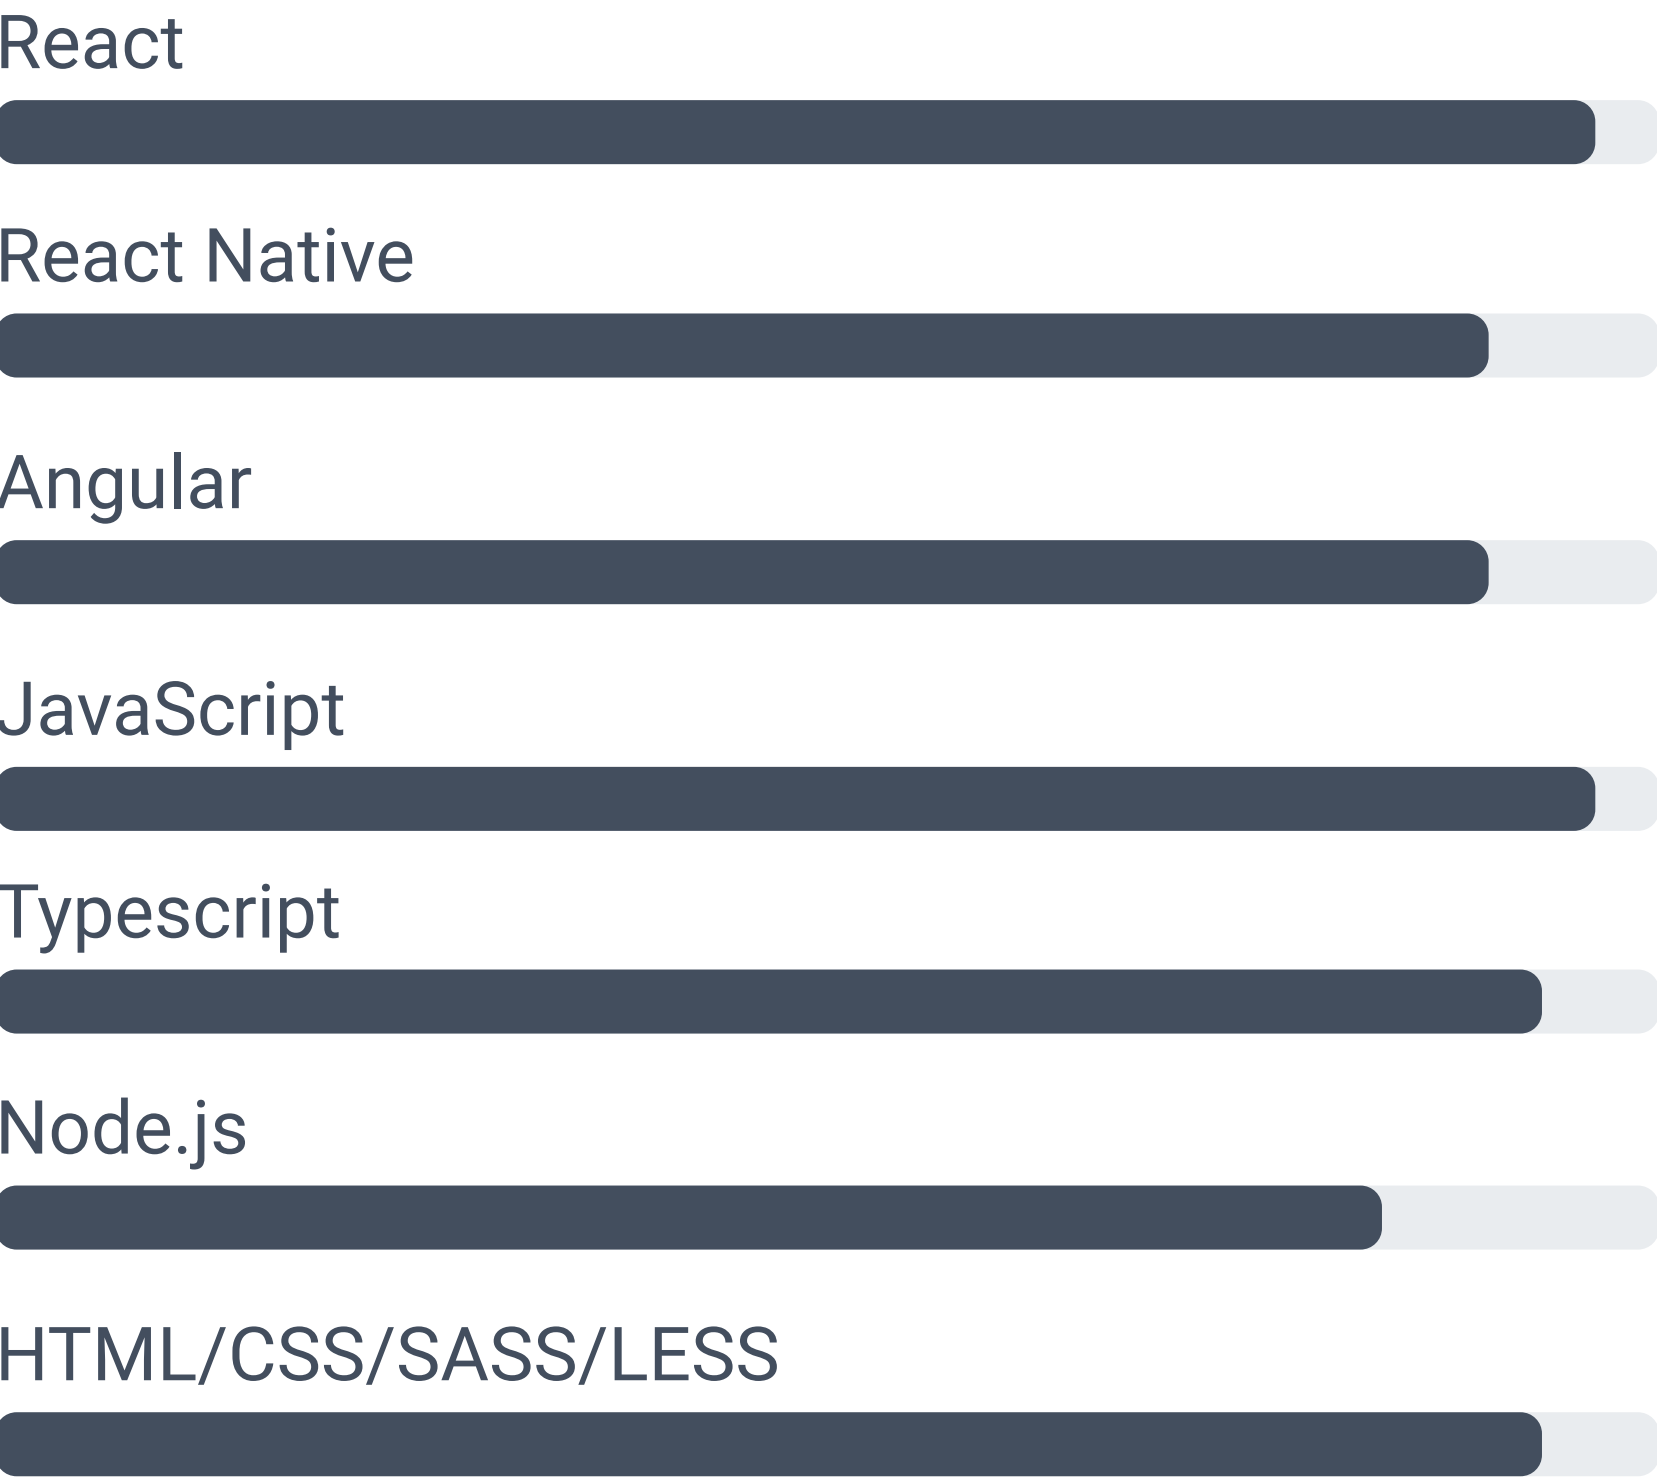

Technologies used:
